

TISSUE PAPER FLORES

Using anywhere from 4-6 pieces of tissue paper (5×5 squares) fold the tissue in accordion form.

Fold in half and cut the edges as you would like your flower round or pointy- either works.

Tie the middle of the fold with wire or elastic anything that will create a strong hold.

Once tied start pulling apart the tissue one side at a time and one tissue at a time.

Work slowly and carefully as tissue paper does tear easily.

After all the tissues have been pulled apart on both sides shape your flower by making all separated tissue face one way.
